			To start with its an interesting elective since u will be starting from ages back. Its main aim is to	.,			and the second s		
			let us know how the current trends of modern history(like post modernism,etc) have emerged						
			from the past ,so we'll be dealing age by age. ofcourse the course material changes from year to						
			year (i guess since i have seen the pilani question papers and the topics are entirely different.).I						
			prescribe this for the people who have interest in history.						
			coming to the lecturer, frankly he is soo cooperative and willing to help us.but the problem is						
			almost 70-80% of the classes u will be having quizzes.so attendance must be there also after						
			seeing the paper u can realize that u need to go to classes.						
			Also the worst part of this course is he is very strict regarding the quality of the answers u write in						
			exams and presentation material also. Dont ever think of bullying him-its an unnecessary risk.
